note from Derinda:

All Team leaders, pastors, and interested persons.

My team(July 20-30, 2011) will have a surgeon with us who will be doing surgeries. The key to this is having other teams identify and refer these patients to me so we can get them scheduled with the surgeon. I need full contact information, a phone number and a description from the doctor making the referral of the surgical problem with pictures if possible.
