

A Unique Data Base for AHMEN's work in Honduras.

Bruce McFadden is working on a database for use in Honduras for not only the medical teams but other aspects of AHMEN's work as well.

After it is set up, he will hold "in service work shops" prior to teams going down. Just imagine the benefit of looking up patients or projects from year to year, with pictures of them as well as their medicine and how they responded to your treatment.

(pictured above, Bruce and Tom A. at International Medical Seminar, Ciriboya, Honduras, 2011 - below, Bruce with the Jungle team headed for La Mosquitia, 2011)

Bruce hopes to hold a trial run this year - he is working with a

“computer data base guru” and learning as he goes along.

So, what do we need to finish the project?  
We need 6 laptop computers - not new ones. Bruce will delete any personal data. Bruce will reload what he needs. We just need the laptops.

If you, or anyone you know, has a laptop sitting in their closet, please contact Bruce at: [BCMCF@bham.rr.com](mailto:BCMCF@bham.rr.com)
